The essentials

Read your status

Your status remains below the room.

HP	Health
GP	Gold
LV	Lives remaining
WP	Wand tier
AR	Armor tier
GL	Game level

Explore and equip

Clear a combat room to open its exits. Open treasure chests and visit shops to improve your chances. At the shop, the left WP chest sells wand upgrades, the right AR chest sells armor upgrades, and the center merchant restores health.

Wand and armor upgrades cost 15 gold each. Healing costs 5 gold. Your health can reach 5, and you can carry 25 gold.

Keep going

Losing a life restores your health while keeping your equipment, gold and game level. Losing your last life ends the adventure. Release Fire and press again on GAME OVER to start a new game.

Defeat each level's dragon and find the way onward. Watch, listen and experiment to discover the best approach.
